Education

Dr. B.R. Ambedkar National Institute of Technology, Jalandhar
B.Tech in Computer Science Engineering

Aug 2023 – Present
CGPA: 7.71

Technical Skills

Languages: C/C++, Java, Python, JavaScript, HTML/CSS, MySQL, SQLite

Frameworks: Django, React, Tailwind CSS

Tools: Git, GitHub, Postman, Figma, Jupyter Notebook

Core CS: DSA, OOPS, DBMS, OS, CN, LLD, HLD, AI, ML

Experience

Cybersecurity Trainee & Intern – CDAC Noida (Cyber-Gyan)

Jun 2025 – Jul 2025

Ethical Hacking & Penetration Testing Trainee

- Worked on **Audio Forensics – Analysis & Authentication of Digital Audio Evidence**.
- Gained hands-on experience in cybersecurity and digital forensics concepts.
- Used tools including Wireshark, Nmap, Nessus, Nuclei, and Google Dorks.
- Completed labs, quizzes, and assignments under expert guidance.

AI & Data Analyst Intern – XYLOFY

Jun 2026 – Jul 2026

AI & Data Analytics Intern

- Built an **HR attrition prediction model** using Python, Pandas & Scikit-learn; identified tenure, overtime, and job role as top drivers of employee turnover.
- Developed a **house price prediction model**, uncovering that location and square footage had the strongest correlation with price via regression analysis.
- Designed a **sales forecasting system** (SARIMA, Prophet, XGBoost) with Isolation Forest anomaly detection and demand clustering, deployed on a Streamlit dashboard for category/region-level insights.
- Applied EDA, feature engineering, and statistical testing (ADF, time-series decomposition) to translate raw data into actionable business insights.

Projects

Smart Budget Tracker — Django, JavaScript, Python

 [GitHub](#)

- Developed a full-stack personal finance tracker for income, expenses, and budgeting.
- Added Splitwise-style group expense sharing, real-time chat, and financial visualizations.
- Implemented secure authentication, profile management, and image uploads.

CampusConnect — Django, Python, JavaScript, Bootstrap, SQLite

 [GitHub](#)

- Developed a campus social networking platform with JWT-based authentication, enabling secure user registration, login, and session management.
- Implemented community posts, threaded comments, common chat, and private messaging with responsive Bootstrap-based UI for seamless user interaction.
- Designed scalable Django models, RESTful views, and database workflows while integrating secure authentication and CRUD operations.

My Own Shell — Core Java

 [GitHub](#)

- Developed a POSIX-like Unix shell in Java as part of the CodeCrafters challenge.
- Implemented REPL, built-in commands, directory navigation, I/O redirection, quoting support, and command autocompletion.

Plant Disease Detection — TensorFlow, Keras, OpenCV, Streamlit

 [GitHub](#)

- Built a deep learning computer vision system to classify plant leaf images as healthy or diseased using transfer learning with **MobileNetV2** on the PlantVillage dataset (~54,000 images, 38 classes).
- Applied image preprocessing and data augmentation to improve model generalization, achieving **97–99% accuracy**.
- Deployed the trained model as an interactive **Streamlit** web app, enabling users to upload leaf images and instantly receive disease predictions with confidence scores.

Achievements & Extracurriculars

Certifications: [CS50 Web Programming](#) — [CS50 SQL](#) — [CS50 AI](#) — [CS50 Cybersecurity](#)

Competitive Programming: [LeetCode](#) — [GeeksforGeeks](#) — [CodeChef](#) — [Codeforces](#)

- Member – NIT Jalandhar Chess Team
- Joint Sports Secretary – Hostel BH-5 (2023–24)
- Active participant in hackathons, coding contests, and intra-college sports
- Team Lead – HackMol 6.0 30-hour Hackathon
